Panel Mount HDMI Socket to Terminal Block Breakout

PRODUCT ID: 3120

Description

Make your own custom HDMI input or HDMI interface with ease, using this **HDMI Socket to Terminal Block Breakout.** You get a nice solid PCB with an HDMI socket and two strips of terminal blocks that you can use with stranded or solid core wire to assemble your own wiring jigs.

We recommend this adapter when you have some unusual setup like wiring HDMI directly to your FPGA or wiring needs like splicing off the I2C or power pins.

Comes with one fully assembled breakout and a panel mounting.
