727M / 727

**Cable Cutting up to
2/0 AWG Copper**

Molded or dipped grip
models available

727M

Easy Cutting - Two Comfort Levels

The Greenlee 727 cable cutter now comes in two versions. The standard 727 has the familiar PVC handle grips. The new 727M is the same high performance tool with custom molded grips. These new molded grips feature a hard underside for strength and a soft, slip-resistant, ergonomic outside for increased comfort. Also, the extra width of this grip provides a larger load bearing area that makes cable cutting even easier. Feel the difference that the softer, wider grips make.

Both tools use the same forged steel blanks that are heat treated and precision ground to provide long life and easy cutting. In fact, compared to other brands similar tools, the 727 requires the least handle effort available. These tools easily cut copper and aluminum cables up to 2/0 AWG (70 mm²).

Features

- Made of heavy-duty forged steel
- Precision ground and heat treated blades for long life and easy cutting
- Rust-resistant black oxide finish
- Hot riveted joint provides a smooth opening and closing action
- 727 - PVC handle grips
- 727M - Molded comfort handle grips

727
